PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Data Science with experience in Python, JavaScript, SQL, and React.js. Knowledge of software development, database management, object-oriented programming, and AI/ML fundamentals, with hands-on experience building web applications through internship and academic projects.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Web Technologies: HTML5, CSS3, React.js, Responsive Web Design
Core Concepts: OOP, DBMS, Problem Solving, AI/ML Fundamentals, NLP, Data Science
Databases: MySQL, Relational Database Concepts, CRUD Operations
Development Tools: Git, GitHub, VS Code, Debugging, Version Control

EDUCATION

Bachelor of Engineering – Computer Science Engineering (Data Science) 2022 – 2026
Impact College of Engineering and Applied Sciences, Bengaluru **CGPA: 9.01/10**

PCMB 2020 – 2022
Government PU College, Yelahanka 74%

SSLC 2019 – 2020
Zeena English School 82%

INTERNSHIP

Python Full Stack Developer Intern – Dhee Coding Lab Feb 2026 – May 2026

- Developed web application interfaces using HTML, CSS, JavaScript, and React.js, focusing on reusable components and responsive design.
- Used Python, SQL, and MySQL for application logic, database operations, CRUD functionality, and debugging development issues.
- Developed a Django-based Staff Leave Management System with staff and admin workflows for leave applications, approval status tracking, and staff record management.

PROJECTS

Staff Leave Management System (SMLS) – Python, Django, SQL Live Demo

- Developed a web-based leave management application with staff and admin roles, authentication, leave applications, and status tracking.
- Implemented leave request workflows, approval and rejection functionality, and staff record management using Django.
- Built web interfaces and integrated application logic with database operations to manage leave records.

Foodie – Food Ordering Web Application — React.js Live Demo

- Developed a responsive food ordering interface using React.js, JavaScript, HTML, and CSS.
- Implemented food listings, food details, cart, and wishlist functionality using reusable React components.

SheWorks – Online Services Platform — MERN Stack

- Developed a web platform connecting clients with women entrepreneurs offering home-based services using React.js, JavaScript, HTML, and CSS.
- Implemented client and provider interfaces for service browsing, profile management, bookings, order workflows, and dashboards.
- Worked on application data and service-management workflows to support interactions between clients and service providers.

CERTIFICATIONS

- Python Full Stack with Generative AI – Dhee Coding Lab
- Artificial Intelligence – Elewayte
- Data Analytics (Power BI & Tableau) – Great Learning

LEADERSHIP & ACTIVITIES

- Volunteered at a Mega Job Fair, supporting recruitment coordination and event execution.
- Participated in a community Walkathon promoting teamwork and social awareness.
